SILIQUA

Silicone product for the control of mosquito larvae

INSECTICIDE

Technical Sheet

Revision 0 - March 2025

COMPOSITION

Silicone oil

CHARACTERISTICS

Siliqua is a product based on a silicone oil capable of generating a thin film over the surface of still or stagnant water. The thin layer spreads autonomously over the entire surface of the treated water.

Siliqua does not alter the chemical-physical properties of the water with which it comes into contact, therefore not disturbing aquatic life.

Tests carried out by an external body demonstrate its residuality for 3-4 weeks after use. The silicone oil acts in a physical-mechanical manner by controlling mosquito larvae and pupae, forming a barrier on the surface of the water that prevents them from breathing.

Thanks to its mechanical action, Siliqua does not generate resistance phenomena.

Do not use the product against insects other than mosquitoes.

TARGET PEST

Mosquito larvae:
Culex pipiensis
Aedes albopictus
Aedes aegypti

USES

Siliqua can be used on any type of stagnant water, such as: drains, small ponds, saucers, etc.

DOSAGES FOR USE

Siliqua is used at a rate of 1 ml every 0.25 m^2 as is.

Use 5 ml of product for each drain.

Use 10/15 drops for saucers.

In case of use in larger bodies of water, it is advisable to calculate the surface to be treated and use the correct amount of product.

INSTRUCTIONS FOR USE

- Do not ingest.
- Store in a place inaccessible to children.
- Do not contaminate food, drinks or containers intended to contain food during use.
- Read the label carefully and follow the instructions provided by the manufacturer.
- Use protective gloves for chemical products.
- After handling or in the event of contamination, wash thoroughly with soap and water.
- In the event of contact with eyes, rinse thoroughly with water.
- Whoever uses the product is responsible for any damage resulting from improper use.
- Do not reuse the container.
- The completely emptied container must not be disposed of in the environment

WARNING STATEMENTS

Read the label carefully before use.
Read the information regarding the product contained in the relevant safety information sheet.
Since COLKIM has no control over the way in which the product is used, it assumes no responsibility for its use.
The text complies with the content of the product label.
This is intended for PCO trained professionals, agronomists, veterinarians, biologists and graduates in scientific disciplines in general.
